

Centrifugal Pumpsets

typical applications

- pipeline flooding • pipeline pressure testing •
- fresh or seawater transfer • chemical flushing •
- seawater lift • product transfer • fire water
- chemical handling • mud pumping

pump types

- horizontal split case • horizontal end suction •
- horizontal multistage •
- vacuum assisted automatic self priming •
- automatic wet self priming •

materials of construction

- cast or ductile iron castings •
- bronze • stainless steel •
- exotic materials can also be sourced •

build options

- skid mount only • crash / lifting frame •
- trailer mounted • canopy enclosure •

Asia Waterjet Equipment are well established as the largest supplier of hydrojetting equipment and pump systems in the GCC region, and have also packaged a wide range of centrifugal pumps for a multitude of applications.

AWE has continued to expand its centrifugal offerings, with various centrifugal pumpsets already in use across the Middle East & South East Asia, packaging the **highest performing pumps** for use in Oil & Gas, Industrial, Pipeline Pre-Commissioning, Agriculture, Mining, Municipal, and general applications.

Asia Waterjet Equipment have also brought to market, a new **oil tank re-suspension package**. This new technology uses a chemical-free, non-man entry method of reclaiming up to 90% of trapped hydrocarbons from storage tank sludge.

Engineer

Translate your requirements into technical drawings, manage the production, and ensure quality control.

Package

Our skilled technicians assemble the various elements and finalise the fabrication.

Unit Options

Both our diesel and electric formats have customisable unit options include; trailer, canopy, or skid-mounted.

Commissioning

Free basic training of pump operation & commissioning assistance is provided with every unit purchased.

Accessories

A full range of spare parts and accessories can be ordered through AWE.
