Quality Products

Parts & Servicing

Your Professional Jetter Partner

Supplying durable, versatile products is just the start of our long-term customer relationships. Our experienced teams are always available to give free technical advice, demonstrations, commissioning and instruction on purchase, plus exceptional after-sales support that includes safety and method training, 24 hour spares and nationwide servicing.

As a quality assured company, all Flowplant equipment is:

- Manufactured to the ISO9001:2008 quality assurance standard
- Fully compliant with industry regulations: BS EN 1829 parts 1 and 2
- CE marked to ensure compliance with the European Machinery Directive

We also have:

- Full UVDB approval
- VCA type approval for our trailer mounted equipment
- Membership and accreditation of the Water Jetting Association
- Membership of the NADC (National Association of Drainage Contractors)

Van Pack Jetters

Our van mounted jetters are designed to be extremely lightweight, with a compact foot print and build quality second to none. We also offer a complete professional installation of the van pack into your chosen vehicle, carried out by our highly trained engineers.

Trailer Mounted Jetters

We offer a wide and varied range of reliable and versatile trailer jetters with options including: jetting performance parameters; water carrying capacity; 2 or 4 wheel models.

Truck Mounted Jetters

We manufacture a large range of innovative and high quality truck mounted drain cleaning machines, including high pressure jetter vehicles. These range from 3.5 ton box type vans to large purpose built sewer and drain cleaning vehicles.

Whatever you need to successfully run your jetting business,
you can depend on Flowplant.

Accessories

Flowplant has a wide and varied range of drain and sewer jetting equipment spares and accessories including high pressure drain jetting nozzles and jetting hoses.

Each jetter comes complete with:

- Wide range of equipment as standard
- On-site instruction on operation & maintenance
- 12 month warranty

Most models are available with the option of full Radio Remote Control making the equipment suitable for One Man Operation and enabling jetting up to 100 metres from the vehicle.

Customised Service

With many members of staff having tens of years of experience in drain jetting systems and equipment, Flowplant has earned an enviable reputation for our pre and post sales customer service. This includes rapid nationwide support for demonstrations, servicing, maintenance and repairs, with spares available within 24 hours.

Our role is to be the jetting systems partner for your business, providing a personal service that suits your needs, whatever the size of your operation. Our local support network for both

sales and high quality after-sales service comes with a 'can-do' attitude designed to help keep your business growing.

Technical Advice

With the constant introduction of new accessories and processes in the water jetting industry, application knowledge can be invaluable to you. Our technical team offers up to date information and advice on all types of high pressure jetting equipment and their application.

Technical Hotline: 01722 344 091

On-site Demonstrations

Supporting You Through the Lifetime of Your Jetter

On-site Demonstrations

There is a wide range of drain and sewer cleaning machines to choose from and selecting the model most suitable for your needs can be a difficult task. Why not contact us and arrange for a member of our team to come and discuss your drain jetting and sewer cleaning requirements and carry out a no obligation on-site demonstration.

Commissioning

Following the purchase of your drain cleaning equipment, it is important that it is correctly set up and safe to use by you and your operators. Recognising this is an important part of the purchasing process, on-site commissioning of equipment is another valued added service that we are happy to provide free of charge.

Problem Solving

Put us to the test and call our technical hotline with your drain clearing query. Whether this is to just clean or jet a pipeline or the jetting of surfaces or equipment, you can rest assured we will have encountered your water jetting machine question in the past and be able to offer expert technical advice.

Technical Hotline: 01722 344 091

Training (WJA Approved)

High quality training, for you and your staff, guarantees equipment is used safely and efficiently, ensuring that you meet your H&S obligations while also achieving maximum financial benefit by realising the product's full potential.

We offer a complete portfolio of training courses to suit all users and applications, held in our dedicated, fully equipped on-site training facilities at locations across the UK. City and Guilds accredited, our courses are run in accordance with the Water Jetting Association (WJA) guidelines and uses its Safety Code of Practice.

Our experienced and professional training personnel also provide advice, solutions and specialist knowledge gleaned from a huge range of applications and situations.

Servicing & Maintenance

Our nationwide network of service centres and mobile engineers are always on hand to offer expert advice on all aspects of maintaining your water jetting systems, pumps and equipment. A full range of spares is readily available within 24 hours.

Our Service Division can advise you or your engineering staff plus undertake servicing, repairs and remedial work in the field, from our fleet of mobile vans, or at our service centres.

We offer a range of servicing and maintenance packages to suit your requirements, ensuring your equipment is always operating reliably, efficiently and safely.
