

# Automated Pipe Cleaning Unit

Automated system for the cleaning of inner and outer diameters of pipe in a single unit, removing products such as cement, drill mud and hydrocarbon products including NORM/LSA with high pressure water jets.

## Features

- Fully automated loading system
- Cleans ID and OD of pipe in one operation, incorporating the Stoneage ID and OD cleaning systems
- Various configurations available for cleaning of up to 4 lengths simultaneously
- Air conditioned control room with intuitive controls for hands-free operation, away from risk of contamination

## Benefits

- Automated operation delivers consistent and repeatable results
- Less risk of human exposure to hazardous materials such as NORM
- Independently adjustable stroke & rotation of ID/OD cleaner suits any type of deposit

# Automated Pipe Cleaning Unit

## Stoneage Inside Diameter Pipe Cleaner

The ID pipe cleaner can run pressures up to 40k psi and has adjustable rotation and stroke controls to optimize blast settings for any deposit.

- Rigid rotating lance allows all power or flow to be concentrated for cleaning
- Heavy-duty carriage assembly adapts to large diameter lances
- Compatible with the Stoneage range of rotary nozzles for optimal cleaning

## Stoneage Outside Diameter Pipe Cleaner

The stroke length of the OD pipe cleaner can be adjusted to suit the pipe lengths being cleaned for efficient cleaning with no wasted time.

- Several head options available for delivering more concentrated power or covering a wider cleaning path
- Rotation and traverse speed are independently adjustable to customize dwell time
- Can be adapted to a variety of pressures and flows

**Powered by the AWE Jetstream high pressure waterjetting pump system - performances available up to 40,000psi.**
