

Automated Pipe Cleaning Unit

Automated system for the cleaning of inner and outer diameters of pipe in a single unit, removing products such as cement, drill mud and hydrocarbon products including NORM/LSA with high pressure water jets.

Features

- Fully automated loading system
- Cleans ID and OD of pipe in one operation, incorporating intelligent automated ID and OD cleaning systems
- Various configurations available for cleaning of up to 4 lengths simultaneously
- Air conditioned control room with intuitive controls for hands-free operation, away from risk of contamination

Benefits

- Automated operation delivers consistent and repeatable results
- Less risk of human exposure to hazardous materials such as NORM
- Independently adjustable stroke & rotation of ID/OD cleaner suits any type of deposit

Automated Pipe Cleaning Unit

Inside Diameter Pipe Cleaner

The ID pipe cleaner can run pressures up to 40k psi and has adjustable rotation and stroke controls to optimize blast settings for any deposit.

- Rigid rotating lance allows all power or flow to be concentrated for cleaning
- Heavy-duty carriage assembly adapts to large diameter lances
- Compatible with a range of rotary nozzles for optimal cleaning

Outside Diameter Pipe Cleaner

The stroke length of the OD pipe cleaner can be adjusted to suit the pipe lengths being cleaned for efficient cleaning with no wasted time.

- Several head options available for delivering more concentrated power or covering a wider cleaning path
- Rotation and traverse speed are independently adjustable to customize dwell time
- Can be adapted to a variety of pressures and flows

Powered by the AWE Jetstream high pressure waterjetting pump system - performances available up to 40,000psi.
